

Major Project Report

On

Skin Lesion Classification for Disease Detection

Submitted in partial fulfillment of the requirements for the award of degree of

BACHELOR OF TECHNOLOGY

in

**COMPUTER SCIENCE & ENGINEERING
(Artificial Intelligence & Machine Learning)**

by

20WH1A6603 B.Tanmayee

20WH1A6604 P.Abheesta

20WH1A6605 G.Spurthy Vahini

20WH1A6624 M.Devi Sri Chandana

21WH5A6605 M.Ashwini

Under the esteemed guidance of

**B.Kishore Kumar
Assistant Professor, CSE (AI&ML)**

**Department of Computer Science & Engineering
(Artificial Intelligence & Machine Learning)
BVRIT HYDERABAD COLLEGE OF ENGINEERING FOR WOMEN
(Approved by AICTE, New Delhi and Affiliated to JNTUH, Hyderabad)
Accredited by NBA and NAAC with A Grade
Bachupally, Hyderabad – 500090
2023-24**

CERTIFICATE

This is to certify that the project entitled “Skin Lesion Classification for Disease Detection” is a bonafide work carried out by **Ms. B. Tanmayee (20WH1A6603), Ms. P. Abheesta(20WH1A6604), Ms. G. Spurthy Vahini (20WH1A6605), Ms. M. Devi Sri Chandana(20WH1A6624), Ms. M. Ashwini(21WH5A6605)** in partial fulfillment for the award of B.Tech degree in **Computer Science & Engineering (AI&ML) , BVRIT HYDERABAD College of Engineering for Women, Bachupally, Hyderabad**,affiliated to Jawaharlal Nehru Technological University Hyderabad, Hyderabad under my guidance and supervision. The results embodied in the project work have not been submitted to any other University or Institute for the award of any degree or diploma.

DECLARATION

We hereby declare that the work presented in this project entitled “**Skin lesion classification for disease detection**” submitted towards completion of Project work in IV Year of B.Tech of CSE(AI&ML) at **BVRIT HYDERABAD College of Engineering for Women**, Hyderabad is an authentic record of our original work carried out under the guidance of **Mr. B. Kishore Kumar, Asst. Prof, Dept of CSE(AI&ML)**

ACKNOWLEDGEMENT

We would like to express our sincere thanks to **Dr.K.V.N.Sunitha, Principal, BVRIT HYDERABAD College of Engineering for Women**, for her support by providing the working facilities in the college.

Our sincere thanks and gratitude to **Dr B Lakshmi Praveena, Head of the Department, Department of CSE(AI&ML) , BVRIT HYDERABAD College of Engineering for Women**, for all timely support and valuable suggestions during the period of our project.

We are extremely thankful to our Internal Guide, **Mr.B.Kishore Kumar, Asst Professor, CSE(AI&ML), BVRIT HYDERABAD College of Engineering for Women**, for his constant guidance and encouragement throughout the project.

Finally, We would like to thank our Major Project Coordinator, all Faculty and Staff of CSE department who helped us directly or indirectly. Last but not least, we wish to acknowledge our **Parents** and **Friends** for giving moral strength and constant encouragement.

B. Tanmayee(20WH1A6603)

P. Abheesta(20WH1A6604)

G. Spurthy Vahini(20WH1A6605)

M.Devi Sri Chandana(20WH1A6624)

M. Ashwini(21WH5A6605)

ABSTRACT

Skin cancer, encompassing various types, presents a diagnostic challenge due to diverse morphological features. Timely identification of skin lesions is crucial for effective medical intervention. Traditional methods, reliant on visual inspection and invasive procedures, may result in delayed or inaccurate diagnoses. This project proposes a solution using deep learning, specifically Convolutional Neural Networks (CNNs), to automate skin lesion classification. Leveraging diverse datasets and transfer learning, the model learns intricate patterns, facilitating accurate disease identification. The objective is to provide a scalable, objective, and accessible tool, potentially reducing dependence on subjective interpretations and enabling early intervention for dermatological conditions.

LIST OF FIGURES

S.No	Description	Page. No
1	Literature survey	4
2	Modules	10
3	ResNet 152	12
4	Class Activation Maps(CAM)	13
5	Dataset	19
6	Appended MetaData regarding the dataset	20
7	Original image(left) and augmented image(right)	20
8	Image visualization	21
